Suppliers are required to meet the following requirements and will understand Milwaukee Electronics' QMS requirements to AS9100 and ISO 13485 concerning control of externally provided processes, products, and services.

- Maintain a quality management system that includes control over approved external providers.
- Suppliers shall ensure personnel performing work affecting product conformity or product safety are competent and, where required, appropriately qualified or certified. Evidence of qualification shall be maintained and made available upon request.
- Suppliers shall comply with any identified special requirements, critical items, or key characteristics as defined in applicable drawings, specifications, purchase orders, or other contractual documents. When required, suppliers shall apply specified statistical techniques for product acceptance and shall ensure appropriate controls, inspection, and verification activities are implemented to ensure continued conformity to these requirements.
- Provide objective evidence of product conformity to all applicable drawings, specifications, and purchase order requirements, including a Certificate of Conformance (C of C) and, where required, applicable inspection, test, or acceptance records. Quality records shall be retained for a minimum of five years unless otherwise specified on the purchase order.
- In the event that nonconforming product has been inadvertently shipped, supplier shall notify Milwaukee Electronics immediately and obtain approval for disposition of the nonconforming product. Suppliers shall support post-delivery activities, including investigation of nonconformities, corrective actions, and support related to product safety or regulatory requirements.
- Milwaukee Electronics, its customers, and applicable regulatory authorities, shall be granted the right of access, with prior arrangement, to the supplier's facilities and to applicable documented information, at any level of the supply chain, for the purpose of verifying conformity of externally provided processes, products, and services to specified requirements.
- Suppliers shall flow down all applicable Milwaukee Electronics requirements, including applicable customer and regulatory requirements, to their external providers and sub-tier suppliers, and shall ensure such providers comply with these requirements.
- Suppliers shall notify Milwaukee Electronics in writing prior to implementation of any changes to processes, products, or services, including changes to external

Uncontrolled Document if Printed

providers or the location of manufacture, and shall obtain Milwaukee Electronics' approval before such changes are implemented.

- Suppliers shall maintain a program to prevent, detect, and remove counterfeit parts or materials from the supply chain.
- Suppliers shall maintain controls to ensure Foreign Object Debris (FOD) free products are delivered to Milwaukee Electronics.
- Supplier shall provide/maintain measuring and test equipment required to assure conformance to Milwaukee Electronics' PO requirements along with a corrective action process to eliminate causes of nonconformities in order to prevent recurrence.
- Perishable material must be clearly identified with the date of manufacture and date of expiration and have at least 30% of shelf life remaining at time of delivery.
- Hazardous materials shall be clearly identified as such and the supplier shall provide safety data sheets with first delivery.
- Product and materials shall be packaged using the best commercial practices to prevent damage, deterioration and degradation.
- Performance Criteria: Critical Suppliers will be evaluated on Cost as Purchase Price Variance (PPV), Quality as Defect Material Rate (DMR), On Time Delivery, and Customer Service as defined by "Service Rating". The top 80% of providers by spend will receive a quarterly scorecard with the remaining rated annually.
